Testimonial: Luminet Web & Multimedia Solutions
December 2009

Sometimes you just need the right person for the job, and for me, that person was Diane at Luminet Web and Multimedia Solutions.

From my ideas and flights of fancy, Diane created a fully developed, interactive, professional website, that goes beyond being a facility to showcase my work.

Her knowledge of search engine optimisation and skill as a designer means that, working with Diane, you can expect more than the standard templates.

With clear guidance and an appreciation for 'outside the box' thinking, what would have been handed over to become 'just another project' to anyone else became a great collaborative experience.

Delivering a service above and beyond that of her competitors, my thanks to Diane for creating a website I am both confident in and proud of. I would love to work with Diane again, except she's done too good a job first time around!
